

Lean Maintenance: The Role of Maintenance in Delivering Lean Thinking

ONE DAY WORKSHOP

This one day workshop will present the value of Lean Maintenance to organizations who want to deliver year on year improvements in performance through Lean Thinking.

Included in the programme are presentations on Lean Maintenance Best Practice together with tools and techniques to help you assess your organizations current practices and develop a route map to Manufacturing Excellence.

In addition, delegates will experience the value of a Lean Maintenance Strategy through participation in a Lean Maintenance Simulation. Used on a worldwide basis, the simulation highlights the importance of the maintenance function in delivering best in class performance through proactive asset management.
