

Delivering The Lean Transformation

3 Day Workshop

29 – 31 March 2010 Reading, Berkshire, UK

Practitioner Level Workshop

A workshop for manufacturing managers, team leaders and change agents that want to deliver year on year improvement in performance in a multi shift, multi functional manufacturing environment.

You've done the training, got the basics of Lean and/or Six Sigma in place and had some successes so what next? Just as passing your driving test doesn't equip you for competing in formula one. Achieving top class continuous improvement results depends on knowing how to build on current capabilities and break through to the next level of capability.

*Learn how to **take your improvement process to the next level**, develop your organisations **self directing team capability and map out your** organisations road map to year on year improvement in performance*

DAK Consulting,

Chiltern House, 45 Station Road, Henley on Thames, RG9 1AT, UK
Telephone: +44 (0)1491 845504, email: info@dakconsulting.co.uk

Booking Details

Delivering the Lean Transformation Workshop

Location Reading, Berkshire

Cost: £950 per delegate plus VAT includes all course materials refreshments, and lunch on all 3 days.
Accommodation can be arranged at an additional cost.

Why attend the Workshop

Organisations that develop the capability to deliver year on year improvement in performance pass through similar phases or tipping points on the way. Those that make the fastest progress are able to anticipate the organisational and behavioural changes needed to progress through each phase well in advance.

Just as passing your driving test doesn't equip you for competing in formula one. Achieving top class continuous improvement results depends on knowing how to build on current capabilities and break through to the next level of capability.

The workshop content is designed to help you identify where your organisation is on the manufacturing transformation road map and how to progress to the next level. This workshop uses simulation and case studies to help participants to identify and develop tactics to accelerate progress through the manufacturing transformation change milestones.

Workshop Agenda

Engaging the Organisation

Carry out a diagnostic review to define your organisations improvement treasure map, improvement potential, priorities and tactics for improvement.

Understand the different messages needed to engage senior, middle and front line personnel with a common improvement agenda.

Define improvement accountabilities for the 12 key roles need to mobilise improvement activities, hold the gains and accelerate idea deployment in a multi shift, multi function manufacturing organisation.

Changing the shop floor reality

Understand how to set and raise standards to improve flow, productivity, assure consistent practices and delegate tasks to free up management and specialist time.

Learn how to design the route map to high performance teamwork for your team, function or organisation. Develop tactics to overcome limiting behaviours and reinforce new ways of working.

Understand how to apply facilitation, coaching and mentoring tool sets to secure lasting change and align short and long term manufacturing improvement agendas.

Developing Capability

Learn how to extend the focus of continuous improvement from the shop floor to all personnel including support functions.

Use visual thinking tools to tap into the power of cross functional innovation and produce collaborative value added networks and closer integration.

Reinforcing Change

Understand how to use audit/coaching tools to progress from policing conformance towards self managed teamwork and how to increase the return on investment from training.

Gain an insight into the frameworks and processes used by leading organisations to assess organisational improvement status and forward development milestones.

Action Planning

The final session of day 3 will include activities to help delegates develop their own implementation programmes and

Workshop Leader

The workshop will be led by Dennis McCarthy.

Dennis has supported Continuous improvement programmes ranging in size from small single site applications to company wide multi site transformation programmes in Europe, USA, India and China. This has included support for well respected and award winning companies such as 3M, Ford, General Motors, GE, RHM and Dow Corning.

Recently he co authored his second book "Lean TPM a blueprint for change", with Nick Rich of Cardiff University Business School. Published by Butterworth Heinemann, sets out how the combination of Lean and TPM has been used as the delivery mechanism for winning manufacturing strategies.
